PROJECTS

TrueFeedback | Anonymous Feedback Sharing Platform | [GitHub](#)

Sep, 2024 – Present

- **Technologies:** ReactJS, NodeJS, MongoDB, ChatGPT integration
- Generates shareable links for anonymous feedback, AI-driven feedback suggestions, privacy-focused, user-friendly interface.
- User-friendly interface designed for seamless navigation and feedback submission.

Book-Hive | Library Management Web Application (Group Project) | [GitHub](#)

Oct–Nov, 2024

- **Technologies:** ReactJS, Tailwind CSS, Spring Boot, MySQL
- Developed a comprehensive library management system with features for book search, borrowing, returning, and inventory management.
- Implemented role-based access for users and administrators.
- Created a *Pre-request Book* feature to allow members to reserve books with limited availability for 10 hours, ensuring the book is set aside for them.

Password Generator | Password Generating Platform | [GitHub](#)

March, 2024

- **Technologies:** HTML, CSS, JavaScript
- Customizable password length, options for numbers, special characters, uppercase/lowercase letters, instant generation with one click, user-friendly interface.

ACHIEVEMENTS

- Solved **300+** problems on [LeetCode](#).
- Achieved **AIR 420** in NIMCET 2023 out of 25,000+ participants.
